

# Our Cookie Policy

Our website uses cookies to distinguish you from other users of our website. This helps us to provide you with a good experience when you browse our website and allows us to improve our website. By continuing to browse this website, you are agreeing to our use of cookies.

A cookie is a small file of letters and numbers which we store in your browser or the hard drive of your computer (with your agreement). Cookies contain information which is transferred to your computer's hard drive.

We use the following cookies:

- **Strictly necessary cookies.** These are cookies that are required for the operation and security of our website.
- **Analytical/performance cookies.** These allow us to recognise and count the number of visitors and to see how visitors move around our website when they are using it. This helps us to improve the way our website works, for example, by ensuring that users are finding what they are looking for easily.

You can find more information about the purposes of the cookies we use below:

1. **Google Analytics**  
Google Analytics allows the webmaster to see how people use the site, what sites they come from and what search terms they use to find the site, along with many other insights to help build a better website.
2. **Google Maps** (for the display of interactive maps)  
Some of our pages include interactive maps provided by Google. Google may set cookies to store information and preferences about maps or other associated Google services on pages where we embed Google maps.
3. **Wordfence Security** (WordPress security plug-in)  
Wordfence is a security plug-in for WordPress and helps keep the site safe and secure. This plug-in will check you're a real human visitor and your geographical location.
4. **Availability Calendar** (by [www.availabilitycalendar.com](http://www.availabilitycalendar.com))  
Some of our pages include calendars to display availability. These calendars are provided to us by a third-party supplier and use cookies.
5. **Cookie Notifications**  
Ironically, to keep track of whether we have shown you the cookie notification message (and your acceptance), we need to set a cookie.
6. **Embedded Content** (e.g. YouTube videos)  
Occasionally, the webmaster may embed content from other sites and services into web pages (for example, embedding a YouTube video into a page). When third party services are used like this, they will usually set their own cookies in addition to the cookies listed above.

Please note that third parties (including, for example, advertising networks and providers of external services like web traffic analysis services) may also use cookies, over which we have no control. These cookies are likely to be analytical/performance cookies or targeting cookies.

### Controlling and blocking cookies

You can block cookies by activating the setting on your browser that allows you to refuse the setting of all or some cookies. However, if you use your browser settings to block all cookies (including essential cookies) you may not be able to access all or parts of our website.

### More information

For more information, including how to control and disable cookies, please visit [cookiesandyou.com](https://www.cookiesandyou.com).
